## KEY FEATURES / UNIQUE SELLING POINTS (USP)

### HIGH CAPACITY LI-PO

The battery inside the V3pro rechargeable is a high capacity low weight Li-Po cell with 2800 mAh. The battery is charged directly in the battery, and therefore you will be able to charge the battery while using a spare battery (sold separately).

### ELECTRONIC SWITCH + DIMMING

With our Intelligent Light Control and electronic dimming you can get just the right light output you need for a given situation. Dim the light stepless from 300 to 6 lumens simply by holding a button.

### SLIDING HYPERFOCUS™

The sliding Hyperfocus™ optical system collects the LED radiance and distributes it with maximum efficiency from a perfect round floodlight beam to a highly intensive, long range spot beam. Just slide the head of the lamp for the correct light setting.

### RED WARNING LIGHT

The red blinking warning light on the back of the battery pack will make you visible from behind. The light can be turned on and off.

### VERSATILE PLUG SYSTEM

Our professional headlamps are fitted with a versatile plug system, that protects and prolongs the products lifetime. The plugs in the headlamp and battery pack will detach, if your headlamp gets tangled.

### DC CONVERTER TECHNOLOGY

The V3pro rechargeable is fitted with our new and highly efficient electronic circuitry. It reduces the heat development of the Power LED and decreases the energy consumption. The advantage is 30-40 % longer runtimes and highest constant light output.
