

## LED Headlamp with motion sensor, 300lm, 800mAh, CCT, movable head

**ViRONE**

Marka: **Virone** | Symbol: **LT-24** | Ean: **5908254851254**

### PRODUCT DESCRIPTION

The LED headlamp is perfect for work that requires free hands and as an additional light source, for example when camping, cycling or going for an evening walk.

It is equipped with five lighting modes - cold light, warm light, neutral light (6500/2700K), red light and red flashing light. The first three modes can be activated using the device's built-in motion sensor, e.g. by waving a hand. The product offers a luminous flux of 300lm and provides a lighting range of up to 50m. The movable

head allows to regulate the lighting angle within 60°.

The headlamp operates at 3W. The LED technology ensures high luminous efficiency. The built-in 800mAh Li-Po battery eliminates the need to change batteries, and the USB-C port allows the product to be charged at any time (cable included). A 4-stage indicator shows the battery charge level.

The headlamp is made of plastic. The IPX4 protection rate provides resistance to moisture and splashes of water from any direction, e.g. during drizzle or light rain.

The dimensions measure: 35x52x28 mm. Black and orange colour.
